July 2020

DIRECTOR OF CHRISTIAN SCIENCE NURSING

Le Verger invites applications for the full-time position of Director of Christian Science Nursing (DCSN). Based on the north shore of Lake Geneva in Switzerland, Le Verger cares for patients from all over Europe and beyond, at their homes or in our small facility. We practice in four languages (French, German, English, and Portuguese) and at present are the only accredited Christian Science nursing facility in continental Europe.

Le Verger is a compact organization with a world-wide vision and practice based on expectancy of quick and complete healing. Our DCSN will be a Journal-listed Christian Science nurse with comparable vision and commitment to spiritual healing, broad practice skills in facilities and in the field, and experience in operational and staff management. Our DCSN heads an international team of dedicated Christian Science nurses. Spiritually based leadership, adaptability in changing circumstances, and flexibility in meeting patients' needs -- these are cherished qualities.

Our DCSN reports to Le Verger's Executive Director and will work alongside the Director of Christian Science Nursing Education and with our Board of Directors. DCSN responsibilities include:

- Acceptance and admission of patients;
- Day-to-day care of patients in their homes and at our facility to the highest standards of Christian Science nursing, and with the expectation of quick and complete healing;
- Sound leadership and oversight of patient care provided by our Christian Science nurses;
- Outreach to the local field.

French language ability is highly desirable, and any of Le Verger's other practice languages will be a bonus. Current language ability need not be a barrier, an aptitude for languages and willingness to learn French are acceptable.

For further information, job description, or to apply, please email Audrey Sentinella at direction@leverger.ch or call +41 21 822 0120.
